

Lean Business Case for AccelRR8 Consortium NonProfit Services Portfolio

Funnel Entry Date: February 1, 2024	Epic Owner: AccelRR8 Consortium Chief Product Officer	Key Stakeholders: Board of Directors, Board Advisors
Epic Description: FOR enterprising leaders in the Tech Services industry WHO are aligned with our values, THE AccelRR8 Consortium IS A 501(c)(3) Non-Profit Organization THAT helps Tech Services industry leaders harness proven accelerators, mathematically capable of generating exponential results, to grow value exponentially at scale. UNLIKE non-profits oriented on roles, groups, or industries, OUR CONSORTIUM is goal-oriented – its services are focused on helping Tech Services industry leaders work together to accelerate success for themselves, their industry, and all humanity.		
Business Outcome Hypothesis: • Tech Services industry leaders: improve their professional network, skills, and opportunities as measured via survey of collaborators • Tech Services industry overall: exponentially better services and benefits to humanity as measured via survey of collaborators • AccelRR8 Consortium: exponentially better services and benefits for Tech services leaders, their industry, and humanity as measured via survey of collaborators		Leading Indicators: • MVP versions of the Professional Networking, Open Knowledge Sharing, and Industry Innovation Services • 1000 subscribers who are net promoters
In Scope: Consortium Services: • Professional Networking • Open Knowledge Sharing including but not limited to the AccelRR8 Body of Knowledge, which in turn includes the AccelRR8 Framework open methodology produced by AccelRR8 LLC • Industry Innovation	Out of Scope: • For-profit products and services • SaaS and Licensed Software • Capital Intensive Services (e.g., hosting on owned servers and data center)	Nonfunctional Requirements: • Desirability: all want exponential success, few know how to generate it, and stakeholders like our values and culture • Viability: the Consortium has the required capabilities and isn't trying to boil the ocean • Sustainability: the core premise (proven accelerators mathematically capable of generating exponential results) is enduring • Performance: the organization's own success will be a key proof of our core premise, creating a virtuous cycle

Lean Business Case for AccelRR8 Consortium NonProfit Services Portfolio

		Usability: becoming and remaining a subscriber, patron, and/or Consortium leader must be incredibly easy
Minimum Viable Product (MVP) Features - Professional Networking, Open Knowledge Sharing, and Industry Innovation offerings v1 - AccelRR8 Body of Knowledge Overview v1 - AccelRR8 Framework v1 (an open methodology produced by AccelRR8 LLC)		Additional Potential Features - Future versions of Professional Networking, Open Knowledge Sharing, and Agile Research & Development Offerings - Future versions of the AccelRR8 Framework - Future components of the AccelRR8 Body of Knowledge
Analysis Summary: MVP desirability, viability, feasibility, and sustainability were verified by the Board of Directors as well as a subset of Advisors and Initial Subscribers.		Go / No-Go: Go!

Solution Analysis	
Which Internal and/or external customers are affected, and how? Our MVP is focused on proving our core premise to establish credibility with our addressable market, which includes leaders and organizations across the Tech Services industry. We will do this by (1) implementing proven accelerators to create Network Effects among a Professional Network of 1,000+ initial collaborators, (2) igniting Viral Ideation across this network via Open Knowledge Sharing, and (3) attracting Industry Innovation grants from initial patrons to begin developing exponential solutions for priority industry challenges via Compounding Innovation , all while harnessing (4) Generative Learning and (5) Artificial Intelligence .	
What is the potential impact on solutions, programs and services? As we gain credibility, we will create a virtuous cycle of exponential growth and impact, crossing the chasm from Early Adopters into Mainstream Adoption by leaders and organizations across the Tech Services industry, materially improving the Tech Services industry and helping humanity.	
What is the potential impact on sales, distribution, deployment and support? Demand Generation, Beneficiaries Engagement, and Delivery of Services for our MVP should be focused on attracting and retaining (A) 1,000+ initial subscribers, and (B) initial patrons, who are Net Promoters of the Consortium's services and its core premise. As our services mature beyond MVP, and we find new revenue sources, we will be able to invest in more sophisticated Demand Generation, Beneficiaries Engagement, and Delivery of Services activities to further accelerate growth and impact.	
Forecasted Costs	
MVP Cost: Estimate: \$50K	Estimated Implementation Cost: Initial estimate: \$500K
Forecasted Returns	
Type of Return: Leading Indicators: Increasing numbers of subscribers in the Professional Network, viral ideas across the network, and exponential solutions to priority industry challenges, tripling every year Lagging indicators: Increasing benefit to subscribers, patrons, and the Tech Services industry, as measured by stakeholder surveys

Development Strategy
In-house or Outsourced Development: In-house development: - Each Service’s Context, Intent, R&D Kit, Media and Analyst Relations Kit, Demand Generation Kit, Beneficiaries Engagement Kit, and Delivery of Services Kit - Initial version of the AccelRR8 Body of Knowledge overview Outsourced development: - Initial version of the AccelRR8 Framework open methodology and its 5 components included in the AccelRR8 Body of Knowledge will be produced by AccelRR8 LLC - Exponential solutions to priority industry challenges produced via Industry Innovation will likely be sourced by other organizations such as other non-profits, open-source communities, etc., and paid for by grants from patrons.
Incremental Implementation Strategy: The Product team will take the “Architectural effort precedes business functionality by one or a few iterations” strategy. Professional Networking, Open Knowledge Sharing, and Industry Innovation Services MVPs (v1) are Portfolio-Level Business Epics being developed concurrently with the AccelRR8 Framework open methodology and the AccelRR8 Body of Knowledge Overview MVPs (v1), which in this context are Architectural Epics that support the Business Epics. Click here for details on the “Architectural effort precedes business functionality by one or a few iterations” strategy. © Scaled Agile, Inc.
Sequencing and Dependencies: Required features of the AccelRR8 Framework open methodology and the AccelRR8 Body of Knowledge Overview MVPs (v1) will be developed before they are needed by the Consortium’s Professional Networking, Open Knowledge Sharing, and Industry Innovation Services MVPs (v1).
