

Lean Business Case for Industry Innovation v1

Funnel Entry Date: February 1, 2024	Epic Owner: Industry Innovation Service Leader	Key Stakeholders: Core Boosters: Board Members, Board Advisors
Epic Description: FOR enterprising leaders involved or interested in the Tech Services industry WHO want to improve their career opportunities and the Tech Services industry's impact THE AccelRR8 Consortium Non-Profit's Industry Innovation Service IS AN AI -powered innovation support function THAT helps patron-supported innovation teams use proven accelerators to develop innovative solutions. UNLIKE other associations that support innovation, OUR SERVICE's own success will be a key proof point of our Consortium's core premise: industry innovation teams, supported by generative learning and AI , use compounding innovation to develop solutions that address priority industry challenges, grow value exponentially, advance the state-of-the-art, and ultimately benefit humanity.		
Business Outcome Hypothesis: Subscribers and Patrons: improve their professional network, skills / capabilities, brand, and opportunities as measured via survey The Tech Services industry: cross-company learning among leaders with scarce talents as measured via survey of subscribers AccelRR8 Consortium: exponential benefits via Market Network Effects (per nfx.com) as measured via survey of subscribers	Leading Indicators: 1000 subscribers participating in the AccelRR8 Consortium professional network are Net Promoters of this service as measured via survey of subscribers.	
In Scope: Patron organizations and individuals can join the AccelRR8 Consortium network as advocates (free advertising, e.g., Bronze Tier)	Out of Scope: Patron organizations and individuals can pay an annual fee and become higher-level patrons (e.g., Diamond, Platinum, Gold, Silver) to co-develop exponential solutions for priority industry challenges	Nonfunctional Requirements: Desirability: all want exponential success, few know how to generate it, and stakeholders like our values and culture Viability: the Consortium has the required capabilities and isn't trying to boil the ocean Sustainability: the core premise (proven accelerators mathematically capable of exponential results) is enduring Performance: the Service's own success will be a key proof of our core premise, creating a virtuous cycle

Lean Business Case for Industry Innovation v1

		Usability: participating in ideation across the network and using the AccelRR8 BOK must be incredibly easy
Minimum Viable Product (MVP) Features - Patron organizations and individuals simply click to identify as an advocate for an innovation team in the AccelRR8 Consortium's free electronic platform - Subscribers simply click to join sponsored innovation teams		Additional Potential Features Free platform that facilitates collaboration among innovation team members (e.g., Discord)
Analysis Summary: MVP desirability, viability, feasibility, and sustainability were verified by the Board of Directors as well as a subset of Advisors and Initial Subscribers.		Go / No-Go: Go!

Solution Analysis	
Which Internal and/or external customers are affected, and how? Our MVP is focused on proving our core premise to establish credibility with our addressable market, which includes leaders and organizations across the Tech Services industry. We will do this by implementing proven accelerators to create Compounding Innovation among patron-supported Innovation Teams while harnessing Generative Learning and Artificial Intelligence .	
What is the potential impact on solutions, programs and services? As we gain credibility, we will create a virtuous cycle of exponential growth and impact, crossing the chasm from Early Adopters into Mainstream Adoption by leaders and organizations across the Tech Services industry, materially improving the Tech Services industry and helping humanity.	
What is the potential impact on sales, distribution, deployment and support? Demand Generation, Beneficiaries Engagement, and Delivery of Service for our MVP should be focused on getting leaders in recognizable organizations to become patrons and support industry innovation teams. As our Service matures beyond MVP, and we find new revenue sources, we will be able to invest in more sophisticated Demand Generation, Beneficiary Engagement, and Delivery of Service activities to further accelerate growth and impact.	
Forecasted Costs	
MVP Cost: Estimate: \$10K	Estimated Implementation Cost: Initial estimate: \$125K
Forecasted Returns	
Type of Return: Leading Indicators: Increasing numbers of industry solutions adopted by and materially benefiting Tech Services industry enterprises, tripling every 2-3 years Lagging indicators: Increasing benefit to subscribers, patrons, the Tech Services industry, and humanity, as measured by subscriber and patron surveys

Development Strategy
In-house or Outsourced Development: In-house development: • Service Strategy, Context, Intent, Development Kit, Demand Generation Kit, Beneficiaries Engagement Kit, and Delivery of Service Kit Outsourced development: None
Incremental Implementation Strategy: The Product team will take the “Architectural effort precedes business functionality by one or a few iterations” strategy. The Industry Innovation Service MVP (v1) is a Portfolio-Level Business Epic being developed concurrently with the AccelRR8 Framework open methodology and the AccelRR8 Body of Knowledge Overview MVPs (v1), which in this context are Architectural Epics that support the Business Epic. Click here for details on the “Architectural effort precedes business functionality by one or a few iterations” strategy. © Scaled Agile, Inc.
Sequencing and Dependencies: Required features of the AccelRR8 Framework open methodology and the AccelRR8 Body of Knowledge Overview MVPs (v1) will be developed before they are needed by the Consortium’s Industry Innovation Service v1.

Additional Supporting Data
Attachments: See Industry Innovation Service Components on Next Slide. These include Service Strategy, Context, Intent, Development Kit, Demand Generation Kit, Beneficiaries Engagement Kit, and Delivery of Service Kit components.
Other Notes and Comments: Methodologies used to develop the Industry Innovation Service MVP include: - The AccelRR8 Framework produced by AccelRR8 LLC - The Scaled Agile Framework produced by Scaled Agile, Inc.
